I read through the Revised Proposed Final Judgement and Competitive Impact Statement.

In the the Revised Proposed Final Judgement, Section III "Prohibited Conduct" should thoroughly prohibit Microsoft from engaging in these business practices. Also, the "Compliance and Enforcement Procedures" which includes the Technical Committee, should provide enough insight into Microsoft's compliance to the final judgement.

The Revised Proposed Final Judgement also seems to provide a reasonable balance. Consumers receive a widely used operating system platform (i.e: Windows) that an OEM can freely include any number of Microsoft and non-Microsoft applications. It will also allow Microsoft to continue to provide consumers with an innovative operating system and applications in the future.

I encourage you to accept the Revised Proposed Final Judgement.

Thank you,
Craig Guarraci
